## Objective

I am seeking a paid internship for on the job experience to prepare myself for a profession in Civil and Construction Engineering.

## Experience

Southwestern Energy Water Transfer Roustabout 4 11/2011-05/14

- Responsible for rigging up and managing locations to move water to hydraulic fracturing locations for the production of natural gas.
- Supervise crews in daily operations and communicate with upper management to complete assignments.
- Provided routine maintenance such as pipe repair, pump repair, light plant repair, and other miscellaneous repairs on equipment.
- Monitored pumped produced water, line pressures and integrity, and equipment performance with limited supervision.
- I submitted daily and weekly, verbal and written, reports on ongoing operations and HSE issues.
- Analyzed data and procedures and made proper adjustments in a timely manner if required.
- I cross train for the duties and responsibilities of other Field Service Roustabout positions and water transfer supervisor positions.

Southwestern Energy Water Disposal Roustabout 8/2011-11/2011

- Responsible for daily operation and maintenance of equipment involved in waste water injection into four wells
- Kept records of inbound and outbound liquids, and communicated with water carrier companies to insure we had sufficient water coming to the disposal and the correct loads were being delivered.
- Monitored well conditions and kept logs of well pressures and amounts of water injected.

Southwestern Energy Sand Plant Security Guard 6/2011-8/2011

- Kept records of trucks and personnel coming in and out of sand plant properties
- Communicated with management to give security updates and reports

## Education
